# Plugins

## UI & Customization

- HoverTrailer - Displays movie trailers on hover.
- InPlayerEpisodePreview - Adds an episode list to the video player.
- jellyfin-editors-choice-plugin - Adds a Netflix-style, full-width content slider to the home page to feature selected content.
- Jellyfin-Enhanced - Adds keyboard shortcuts, subtitle styling, TMDB reviews, Jellyseerr search and request integration, and other improvements to Jellyfin.
- jellyfin-icon-metadata - Adds metadata provider icons to Jellyfin.
- Jellyfin-JavaScript-Injector - Injects custom JavaScript into the Jellyfin UI without modifying index.html.
- Jellyfin-MonWUI-Plugin - UI enhancement toolkit for Jellyfin providing customizable sliders, hover trailers, a music player, notifications, and other interface modules.
- Jellyfin.Plugin.ActorPlus - Adds additional details and hoverable filmography to actor portraits and displays actor lists when hovering over movie or series posters.
- jellyfin-plugin-collection-sections - Adds additional sections to `jellyfin-plugin-home-sections` for collections and playlists.

- jellyfin-plugin-custom-tabs - Adds personalized tabs in jellyfin-web for quick access to custom content.
- jellyfin-plugin-GetAvatar - Allows users to choose an avatar from a collection of images.
- jellyfin-plugin-home-sections - Allows users to customize the jellyfin-web home screen with dynamic sections like "Because You Watched" and "Latest Movies".
- jellyfin-plugin-media-bar - A Featured Content Bar to showcase your media collection.
- jellyfin-plugin-pages - Enables other plugins to create custom Jellyfin pages that match the native UI.
- jellyfin-plugin-ratings - Adds user ratings, card overlays, media requests, deletion workflows, chat, and new media notifications to Jellyfin.
- jellyfin-plugin-skin-manager - Helps you to download and install skins.
- Jellyfin-Seasonals - Collections of seasonal themes and animations for Jellyfin.
- jellyscrub - Smooth mouse-over video scrubbing previews. `□□Stale`
  - **NOTE:** Jellyfin 10.9 now natively supports trickplay.
- Static Assets - Upload and serve static assets such as CSS, JavaScript, and images directly from Jellyfin. `□□Stale`

# □□ Collections & Playlists

- jellyfin-favorited-songs-playlist - Automatically creates and updates a "Favorited Songs" playlist containing all your favorited music tracks.
- jellyfin-plugin-auto-collections - Automatically creates and maintains dynamic collections based on flexible criteria.
- jellyfin-plugin-collection-import - Creates and sorts collections by importing from external sources like *mdblist*.
- jellyfin-plugin-provider-stuff - Automates tagging library items with streaming provider tags, creates collections per provider. `□□Stale`
- Jellyfin-Roulette - Adds a roulette feature that plays a random entry from a playlist.
- jellyfin-smartlists-plugin - Creates dynamic collections and playlists in Jellyfin that automatically update based on customizable rules as the library changes.
- playlist-generator - Creates personal playlists based on your listening history.
- TheDwarfsHammer - Enhanced collection management and content discovery for Jellyfin.

# ▶ Playback

- intro-skipper - Fingerprint audio to automatically detect intro and outro segments in Jellyfin.

- jellyfin-plugin-cinemamode - Enables Jellyfin's Cinema Mode with local trailers and pre-rolls.
- jellyfin-plugin-discontinue-watching - Lets you remove items from the Continue Watching list without resetting watch progress, with optional auto-hide after inactivity.
- jellyfin-plugin-jellysleep - Adds sleep timer functionality to Jellyfin.
- Jellyfin.Plugin.StreamLimit - Allows limiting the number of simultaneous streams per user.
- jellyfin-transcode-nag - Nags users when they're transcoding due to unsupported formats or codecs, while allowing bitrate-based transcoding.

# □□ Integration & Sync

- Gelato - Replaces Jellyfin's default search with Stremio-powered results and can automatically import entire catalogs into your library through scheduled tasks.
- jellyfin-ani-sync - Automatically tracks and synchronizes anime watching progress between Jellyfin and Anilist and other services.
- jellyfin-plugin-animethemes - Fetches anime opening and ending themes from AnimeThemes.moe, supporting both audio and video.
- Jellyfin.Plugin.JF_To_Stash_Sync - Synchronizes viewing activity with Stash.
- jellyfin-plugin-letterboxd-sync - Automatically syncs your watched movie history with Letterboxd.
- jellyfin-plugin-listenbrainz - Automatically syncs your music activity with ListenBrainz.
- jellyfin-plugin-streamyfin - Companion plugin for Streamyfin which allows for a centralized configuration of the Streamyfin application.
- jellyfin-rpc by *kennethsible* - Displays your current Jellyfin activity directly on Discord.
- jellyfin-rpc by *Radiicall* - Displays your current Jellyfin activity directly on Discord.
- jellynext - Creates per-user virtual libraries for personalized Trakt recommendations and new seasons.
- Moonbase - Companion plugin for Moonfin clients, providing server-side settings sync, integrations, and a hosted Moonfin Web interface.
- MyAnimeSync - Automatically synchronizes anime watching progress between Jellyfin and MyAnimeList.
- Plexyfin - Automatically synchronizes artwork and collections from Plex to Jellyfin.
- Shokofin - Integrates Shoko Server with Jellyfin for anime library management.

# □□ Notifications

- Jellyfin-Newsletter - Sends newsletters and notifications about library changes (additions, updates, deletions) via email, Discord, or Telegram.
- Jellyfin-Newsletter-Plugin - Newsletters for recently added media. □□Beta
- jellyfin-plugin-DiscordNotifier - Sends notifications of Jellyfin server events to Discord.
- jellyfin-plugin-TelegramNotifier - Receive notifications of Jellyfin server events via Telegram.
- NotifySync - Adds a notification bell to Jellyfin that displays recent additions.

# □□ Authentication

- jellyfin-plugin-ldapauth - Allows the use of LDAP as an auth provider.
- jellyfin-plugin-sso - Allows users to sign in through an SSO provider. □□Beta
- Jellyfin Security - Natively adds TOTP and email 2FA, passkeys, OIDC/SSO sign-in, brute-force protection, IP allowlists, device pairing, trusted browsers, and audit logging to Jellyfin.
- TeleJelly - Allows users to sign in through the Telegram Login Widget.

# □□ Library Management

- AniLiberty STRM Plugin - Generates AniLiberty STRM libraries for Jellyfin with metadata, intro markers, and watch-progress sync.
- Jellyfin Ignore - Ignores filename patterns on library scans. □□Beta □□Stale
- jellyfin-local-posters - Automatically matches and imports local posters using TPDb and MediUX filename formats. Also supports syncing posters from Google Drive.
- jellyfin-musictags-plugin - Automatically extracts audio file metadata and converts it into standard Jellyfin tags.
- jellyfin-plugin-air-times - Provides localized series air times based on server location. □□ Stale
- jellyfin-plugin-enigma2 - Supports Vu+ & Enigma2 live TV streamers. □□Stale
- jellyfin-plugin-languageTags - Adds language tags to media based on audio tracks using FFmpeg.
- jellyfin-plugin-localrecs - Generates personalized movie and TV recommendations based on local watch history without external services required.
- jellyfin-plugin-media-cleaner - Automatically removes played media after a specified time period.
- jellyfin-plugin-MediathekViewDL - Integrates MediathekViewDL into Jellyfin and allows users to search, download, and manage content.

- jellyfin-plugin-meilisearch - Enhances Jellyfin search speed and accuracy by offloading queries to a Meilisearch instance.
- jellyfin-powertoys - A collection of plugins to enhance Jellyfin with additional features and tools.
- JellyfinTweaks - Overrides Jellyfin settings such as *Enable Backdrops* and *Enable Theme Music* across all devices.
- Jellyfin-Xtream-Library - Syncs Xtream VOD and Series content to native Jellyfin libraries via STRM files, with automatic metadata lookup and Live TV support.
- JellySTRMprobe - Probes STRM files to extract media information (codec, resolution, duration, audio) that Jellyfin skips during library scans.
- media-upload-plugin - Media-manager that provides uploads, bulk downloads from URLs, and directory browsing within Jellyfin. `□□Stale`
- quality-gate - Restrict users to specific media versions based on configurable path-based policies, useful for bandwidth management or tiered access.
- smart-covers - Cover extraction for books, audiobooks, comics, magazines, and music libraries with online fallback via Open Library & Google Books.
- whisper-subs - Automatically generates subtitles using local AI models powered by Whisper, with all processing on your server.

# □□ Metadata Providers

- jellyfin-imdb-rating-updater - Downloads the IMDb ratings dataset daily and updates the CommunityRating field for library items with an IMDb ID without modifying other metadata.
- jellyfin-plugin-AnimeMultiSource - Aggregates anime metadata, tags, artwork, and people from multiple sources (AniList, AniDB, MAL/Jikan, TVDB, Fanart.tv) with rate limiting and persistent caching for large libraries.
- jellyfin-plugin-applemusic - Fetches album and artist metadata from Apple Music.
- Jellyfin.Plugin.ArtworkMultiSource - Combines posters and logos from TMDb and TVDB with language-aware priority and configurable sorting.
- jellyfin-plugin-hikka - Metadata and images for anime and manga from the Hikka website.
- jellyfin-plugin-kinopoisk - Metadata provider for Kinopoisk.
- Jellyfin.Plugin.MDBList_Ratings - Retrieves ratings from MDBList using TMDb IDs and integrates them into Jellyfin's rating fields, with optional UI enhancements to display ratings from multiple sources.
- jellyfin-plugin-myanimelist - Provides MyAnimeList metadata for anime.
- jellyfin-plugin-onepace - Provides metadata and cover art for the One Pace project.

- Jellyfin Plugin PhoenixAdult - Metadata provider for adult content from multiple sites. □□ `Stale`
- jellyfin-plugin-shikimori - Metadata provider for shikimori.one.
- Jellyfin Plugin Stash - Metadata provider for Stash.
- Jellyfin Plugin ThePornDB - Metadata provider for ThePornDB.
- jellyfin-youtube-metadata-plugin - Provides metadata for YouTube content.

# □□ Companion Apps & Tools

## □□ Artwork & Posters

- aphrodite - Enhances media library posters with quality indicators like resolution, audio codec, and review ratings. □□`Stale`
- CoverMaker - Allows designing and generating custom cover images for your media collections.
- Jellyfin-Cover-Maker - Website for creating consistent covers and posters for Jellyfin libraries.
- Jellyfin-Image-Exporter - Exports images (posters, banners, thumbnails) from Jellyfin metadata.
- jellyfin-poster-hrd-logo - Automatically downloads covers for HDR movies from TMDb and applies an HDR logo in the top-right corner. □□`Stale`
- jellyfin_ratings - Replaces Jellyfin ratings with ratings from various sources (IMDb, Trakt, Letterboxd, and others).
- jellyfin-tools - Generates images with Jellyfin-like styling such as shadow overlays and library title text. □□`Stale`
- Jellyfin Update Poster - Batch imports cover images from ThePosterDB and MediUX, with set downloading support for MediUX.
- jellytools - CLI tool for synchronizing artwork and collections from Plex to Jellyfin and generating animated library card videos. □□`Stale`
- pixelfin - Inspects Jellyfin libraries for missing, present, or low-resolution images with export support.
- Posterizarr - Automates poster, background, and title card creation for Plex, Jellyfin, and Emby with customizable overlays.
- TitleCardMaker - Automated title card maker for Plex, Jellyfin, and Emby.

# □□ Media Requests & Discovery

- Anchorr - Discord bot for Jellyfin media requests and new content notifications.
- AudioBookRequest - Request management tool for audiobooks on Plex, Jellyfin, and Audiobookshelf.
- content-recommender - Suggests movies or TV shows from your library based on watch history.
- jellyfin-updoot - Adds thumbs-up recommendations, per-item comments, and a "recommended by users" page.
- jellyseerr - Request management and media discovery tool for Jellyfin, Plex, and Emby.
- List-Sync - Automatically import movies and TV shows from IMDB or Trakt lists into Jellyseerr. `□□Beta`
- reiverr - Combined interface for Jellyfin, TMDB, Radarr, and Sonarr. `□□Beta`
- scenepeek-android - An Android app that provides detailed movie and TV show information with TMDB and Jellyseerr integration.
- SuggestArr - Automatically request suggested movies and TV shows to Jellyseerr based on recently watched.
- swiparr - Swipe through your library, match with friends in a session, and find something everyone wants to watch.
- whatseerr - WhatsApp bot for Seerr that allows users to search and request media via WhatsApp messages.

# □□ Statistics & Watch History

- jellyfin-rewind - A *Spotify Wrapped*-like experience for Jellyfin music listeners.
- jellyfin-watch-updater - Updates `lastPlayedDate` for watched items when clients fail to set it, enabling tools such as media cleanup plugins to correctly detect watched media.
- JellyPlex-Watched - Syncs watch history between Jellyfin, Plex, and Emby Servers.
- Jellystat - Statistics and analytics dashboard for Jellyfin.
- jelly-watch-wise - Monitors and enforces Jellyfin watch time limits per user, with API integration and a simple GUI. `□□Stale`
- streamystats - Statistics service for Jellyfin, providing analytics and data visualization.
- watchstate - Syncs play state between different media servers.

# □□ User Management

- Jellycord - Discord companion bot for managing JFA-GO instances. `□□Stale`
- jellyfin-telegram-channel-sync - Syncs Jellyfin user access with Telegram channel membership, automatically disabling accounts when members leave.
- jfa-go - User- / Invite-Management system for Jellyfin.
- jf-avatars - Allows users to select avatars from an image gallery.
- wizarr - Advanced user invitation and management system.

# □□ Media Organization

- CineSync - Python-based library management tool for organizing debrid and local libraries without Sonarr or Radarr.
- Fixarr - Cross-platform media renaming and backup tool. `□□Beta`
- JellyCC - Command-line tool that audits, repairs and optimizes media to ensure Direct Play on Jellyfin.
- Jellyfin-Auto-Collections - A tool to automatically make and update collections based on internet lists such as IMDb and Letterboxd.
- JellyfinEasyMetadataManager - Desktop tool for managing and editing metadata in Jellyfin libraries.
- jellyfinmanager - Command-line tool for managing Jellyfin watched status with backup/restore capabilities and missing episode detection using TVDB.
- jellysweep - Automatically removes old, unwatched movies and TV shows by analyzing viewing history and user requests.
- mnamer - Customizable tool to automatically rename and organize media files.
- Multi-User Media Cleaner - Query and delete unwanted media content from your Jellyfin server.
- Squishy - Transcode and download your Jellyfin media with fully customizable presets and hardware acceleration.

# □□ Subtitles

- bazarr-jellyfin - Search and download subtitles directly from Jellyfin's native subtitle UI using your Bazarr instance.
- OpenSubtitlesDownload - Automatically or manually downloads subtitles using CLI/Gnome/KDE.
- subgen - Autogenerate subtitles using OpenAI Whisper Model via Jellyfin.

# □□ Music

- AudioMuse-AI - Uses sonic analysis and AI-powered clustering to create tempo and mood-based playlists via the Jellyfin API.
- jellyfin-theme-music-manager - Web application for managing theme songs and backdrop videos for Jellyfin libraries.
- jellyplist - Utility for syncing Spotify playlists to Jellyfin. `□□Beta`
- JellyTunes - Sync your Jellyfin music library to any USB drive or SD card — with optional FLAC to MP3 conversion.
- MusicBrainz-UserScripts - One-click importing of album from Jellyfin into MusicBrainz.
- Playlifin - Converts YouTube Music playlists to Jellyfin playlists.

# □□ Content Import

- calibre2jellyfin - Python script to construct a Jellyfin ebook library from a Calibre library.
- trailarr - Manages trailer downloads for your Radarr and Sonarr libraries.
- trailerfin - Automatically retrieves and creates STRM links to IMDb trailers and places them in the backdrops folder to view trailers on the details page.
- ytdlp2STRM - Streams YouTube, Twitch and more via yt-dlp to Jellyfin.
- ytdl-sub - Automates downloading and metadata generation with yt-dlp.

# □□ Server Administration

- ADRG - Dynamic Docker resource governor using cgroups v2 to throttle background tasks during media activity.
- autopulse - Lightweight automation service that updates Plex, Jellyfin, and Emby libraries based on notifications from media organizers like Sonarr and Radarr.
- autoscan - Replaces the default Plex and Emby behaviour for picking up changes on the file system. `□□Stale`
- Cloud Seeder - One-click installer and maintainer for Jellyfin on Windows, macOS, and Linux.
- declarative-jellyfin - Declarative configuration of your Jellyfin server on NixOS. `□□Beta`
- jellyfin-encoder - Docker-based automatic 720p HEVC/AV1 transcoding service for Jellyfin libraries with NVIDIA and Intel hardware acceleration.
- jellyhub - Indexes media from multiple Jellyfin servers into a single searchable hub.
- Jellyman - CLI tool for installing, managing, and updating Jellyfin on Linux.

- JellyRoller - A CLI Jellyfin Controller. □□Beta
- JellySearch - A fast full-text search proxy for Jellyfin using Meilisearch.
- Jellyswarrm - Reverse proxy that lets you combine multiple Jellyfin servers into one virtual instance.
- Samsung-Jellyfin-Installer - Cross-platform tool that helps you install Jellyfin on Samsung Smart TVs running Tizen OS.
- Universal Plugin Repo - Consolidates many plugin repositories to create a universal catalogue.
- xsrv.jellyfin - Ansible role to deploy and configure Jellyfin.

# □□ Miscellaneous

- embyToLocalPlayer - Lets you watch videos from Jellyfin using a local video player (like VLC and MPV) and syncs watch progress back.
- jelly-clipper - Web application for creating, sharing, and managing video clips from Jellyfin libraries. □□Beta
- Jellyfin Episodes Ratings Grid - Show IMDb episode ratings in a heatmap-style grid on Jellyfin series pages.
- jellyfin-mods - Collection of modifications and customizations for personalizing Jellyfin.
- Jellyfin Notification System - Sends Telegram notifications with media images whenever a new movie, series, season, or episode is added to Jellyfin. □□Stale
- Jellyfin Segment Editor - Manage Jellyfin Media Segment positions.
- KefinTweaks - Collection of UI enhancements and customization tweaks for Jellyfin.
- MPC-JF - Launch external media players (MPC-HC, MPC-BE, PotPlayer) from Jellyfin Web or Jellyfin Media Player.
- Scyphomote - A dedicated remote control for Jellyfin with support for playback transparency, trickplay previews, and more.
- tunarr - Create custom live TV channels from your Plex or Jellyfin library with a web UI and IPTV support.

# □□ Snippets

- snippets/language-overlay - A script to add flags to movie posters.

# □□ Guides

- jellyfin-on-macos - Guide for hosting Jellyfin on macOS with dynamic DNS, geo-filtering, and monitoring dashboards.

# □□ Related

This section includes software, guides and tools that are not *specifically* designed to work with Jellyfin, but can be useful for tasks related to media management or to enhance Jellyfin's functionality.

- Dispatcharr - Self-hosted M3U proxy with IPTV, EPG, and VOD management support.
- ErsatzTV - Stream custom live channels using your own media. `□□Beta`
- Explo - Automated music discovery tool that recommends tracks based on your listening history.
- locatarr - A list of tools used to automate the downloading and organization of media files.
  - radarr - Automates downloading & management of movies.
  - sonarr - Automates downloading & management of TV series.
  - tdarr - Distributed transcode automation + Library analytics + Video health checking. `□□Paid`
  - recyclarr - Automatically sync TRaSH guides to Sonarr and Radarr instances.
- MediaTracker - Media tracker and user rating platform with Jellyfin integration.
- Movary - Media tracker and user rating platform. `□□Beta`
- Multi Scrobbler - Scrobbles music from many sources to many clients. `□□Beta`
- Quasarr - Emulates a usenet indexer and download client to allow direct downloads with sonarr/radarr.
- rffmpeg - A remote FFmpeg wrapper, commonly used for transcoding media on more capable machines.
- speedrr - Change your torrent client's upload speed dynamically, on certain events such as when a Plex/Jellyfin stream starts.
- Threadfin - M3U proxy for Jellyfin (Based on xTeVe).
- TRaSH Guides - Easy-to-understand guides for Sonarr, Radarr, and Bazarr, along with related tools.

# Communities

This section contains links to communities which focus on Jellyfin or related topics.

- Jellyfin Discord - The official Jellyfin Discord server. `□□Official`
- Jellyfin Forum - The official Jellyfin forum. `□□Official`
- Jellyfin Matrix - The official Jellyfin Matrix server. `□□Official`
- r/Jellyfin - The official Jellyfin subreddit. `□□Official`
- r/JellyfinCommunity - An independent, community-run subreddit.
- JellyfinCommunity Discord - An independent, community-run Discord server.

# Contribute

Contributions welcome! But please read the contribution guidelines first. You can also create a new issue.
