30 Journiv

- 1. Installation

1. Installation

Source: https://www.journiv.com/docs/installation/docker

Then go into your terminal and make sure you provide the following permissions for the journiv data folder.

mkdir -p data/app data/postgres data/valkey
sudo chown -R 1000:1000 data
sudo chmod -R 755 data

Then fill in the docker compose file

Then copy paste the .env file

Then in the .env file you should create again some secrets with

docker compose up -d

Then make sure you have your reverse proxy ready !! Because it will only load for the Domain you have set in the .env file!!
