? Plugins

? UI & Customization

- [HoverTrailer](#) - Displays movie trailers on hover.
- [InPlayerEpisodePreview](#) - Adds an episode list to the video player.
- [jellyfin-editors-choice-plugin](#) - Adds a Netflix-style, full-width content slider to the home page to feature selected content.
- [Jellyfin-Enhanced](#) - Adds keyboard shortcuts, subtitle styling, TMDB reviews, Jellyseerr search and request integration, and other improvements to Jellyfin.
- [jellyfin-icon-metadata](#) - Adds metadata provider icons to Jellyfin.
- [Jellyfin-JavaScript-Injector](#) - Injects custom JavaScript into the Jellyfin UI without modifying index.html.
- [Jellyfin-MonWUI-Plugin](#) - UI enhancement toolkit for Jellyfin providing customizable sliders, hover trailers, a music player, notifications, and other interface modules.
- [Jellyfin.Plugin.ActorPlus](#) - Adds additional details and hoverable filmography to actor portraits and displays actor lists when hovering over movie or series posters.
- [jellyfin-plugin-collection-sections](#) - Adds additional sections to `jellyfin-plugin-home-sections` for collections and playlists.
- [jellyfin-plugin-custom-tabs](#) - Adds personalized tabs in jellyfin-web for quick access to custom content.
- [jellyfin-plugin-GetAvatar](#) - Allows users to choose an avatar from a collection of images.

- [jellyfin-plugin-home-sections](#) - Allows users to customize the jellyfin-web home screen with dynamic sections like "Because You Watched" and "Latest Movies".
- [jellyfin-plugin-media-bar](#) - A Featured Content Bar to showcase your media collection.
- [jellyfin-plugin-pages](#) - Enables other plugins to create custom Jellyfin pages that match the native UI.
- [jellyfin-plugin-ratings](#) - Adds user ratings, card overlays, media requests, deletion workflows, chat, and new media notifications to Jellyfin.
- [jellyfin-plugin-skin-manager](#) - Helps you to download and install skins.
- [Jellyfin-Seasonals](#) - Collections of seasonal themes and animations for Jellyfin.
- [jellyscrub](#) - Smooth mouse-over video scrubbing previews. ☐☐Stale
 - **NOTE:** Jellyfin 10.9 now natively supports trickplay.
- [Static Assets](#) - Upload and serve static assets such as CSS, JavaScript, and images directly from Jellyfin. ☐☐Stale

? Collections & Playlists

- [jellyfin-favorited-songs-playlist](#) - Automatically creates and updates a "Favorited Songs" playlist containing all your favorited music tracks.
- [jellyfin-plugin-auto-collections](#) - Automatically creates and maintains dynamic collections based on flexible criteria.
- [jellyfin-plugin-collection-import](#) - Creates and sorts collections by importing from external sources like *mdblist*.
- [jellyfin-plugin-provider-stuff](#) - Automates tagging library items with streaming provider tags, creates collections per provider. ☐☐Stale
- [Jellyfin-Roulette](#) - Adds a roulette feature that plays a random entry from a playlist.
- [jellyfin-smartlists-plugin](#) - Creates dynamic collections and playlists in Jellyfin that automatically update based on customizable rules as the library changes.
- [playlist-generator](#) - Creates personal playlists based on your listening history.
- [TheDwarfsHammer](#) - Enhanced collection management and content discovery for Jellyfin.

?? Playback

- [intro-skipper](#) - Fingerprint audio to automatically detect intro and outro segments in Jellyfin.
- [jellyfin-plugin-cinemamode](#) - Enables Jellyfin's Cinema Mode with local trailers and pre-rolls.
- [jellyfin-plugin-discontinue-watching](#) - Lets you remove items from the Continue Watching list without resetting watch progress, with optional auto-hide after inactivity.

- [jellyfin-plugin-jellysleep](#) - Adds sleep timer functionality to Jellyfin.
- [Jellyfin.Plugin.StreamLimit](#) - Allows limiting the number of simultaneous streams per user.
- [jellyfin-transcode-nag](#) - Nags users when they're transcoding due to unsupported formats or codecs, while allowing bitrate-based transcoding.

? Integration & Sync

- [Gelato](#) - Replaces Jellyfin's default search with Stremio-powered results and can automatically import entire catalogs into your library through scheduled tasks.
- [jellyfin-ani-sync](#) - Automatically tracks and synchronizes anime watching progress between Jellyfin and [Anilist](#) and other services.
- [jellyfin-plugin-animethemes](#) - Fetches anime opening and ending themes from [AnimeThemes.moe](#), supporting both audio and video.
- [Jellyfin.Plugin.JF_To_Stash_Sync](#) - Synchronizes viewing activity with Stash.
- [jellyfin-plugin-letterboxd-sync](#) - Automatically syncs your watched movie history with Letterboxd.
- [jellyfin-plugin-listenbrainz](#) - Automatically syncs your music activity with ListenBrainz.
- [jellyfin-plugin-streamyfin](#) - Companion plugin for Streamyfin which allows for a centralized configuration of the Streamyfin application.
- [jellyfin-rpc by kennethsible](#) - Displays your current Jellyfin activity directly on Discord.
- [jellyfin-rpc by Radiicall](#) - Displays your current Jellyfin activity directly on Discord.
- [jellynext](#) - Creates per-user virtual libraries for personalized Trakt recommendations and new seasons.
- [Moonbase](#) - Companion plugin for Moonfin clients, providing server-side settings sync, integrations, and a hosted Moonfin Web interface.
- [MyAnimeSync](#) - Automatically synchronizes anime watching progress between Jellyfin and MyAnimeList.
- [Plexyfin](#) - Automatically synchronizes artwork and collections from Plex to Jellyfin.
- [Shokofin](#) - Integrates [Shoko Server](#) with Jellyfin for anime library management.

? Notifications

- [Jellyfin-Newsletter](#) - Sends newsletters and notifications about library changes (additions, updates, deletions) via email, Discord, or Telegram.
- [Jellyfin-Newsletter-Plugin](#) - Newsletters for recently added media. Beta
- [jellyfin-plugin-DiscordNotifier](#) - Sends notifications of Jellyfin server events to Discord.

- [jellyfin-plugin-TelegramNotifier](#) - Receive notifications of Jellyfin server events via Telegram.
- [NotifySync](#) - Adds a notification bell to Jellyfin that displays recent additions.

? Authentication

- [jellyfin-plugin-ldapauth](#) - Allows the use of LDAP as an auth provider.
- [jellyfin-plugin-sso](#) - Allows users to sign in through an SSO provider. 🔧Beta
- [Jellyfin Security](#) - Natively adds TOTP and email 2FA, passkeys, OIDC/SSO sign-in, brute-force protection, IP allowlists, device pairing, trusted browsers, and audit logging to Jellyfin.
- [TeleJelly](#) - Allows users to sign in through the [Telegram Login Widget](#).

? Library Management

- [AniLiberty STRM Plugin](#) - Generates AniLiberty STRM libraries for Jellyfin with metadata, intro markers, and watch-progress sync.
- [Jellyfin Ignore](#) - Ignores filename patterns on library scans. 🔧Beta 🔧Stale
- [jellyfin-local-posters](#) - Automatically matches and imports local posters using TPDb and MediUX filename formats. Also supports syncing posters from Google Drive.
- [jellyfin-musictags-plugin](#) - Automatically extracts audio file metadata and converts it into standard Jellyfin tags.
- [jellyfin-plugin-air-times](#) - Provides localized series air times based on server location. 🔧Stale
- [jellyfin-plugin-enigma2](#) - Supports Vu+ & Enigma2 live TV streamers. 🔧Stale
- [jellyfin-plugin-languageTags](#) - Adds language tags to media based on audio tracks using FFmpeg.
- [jellyfin-plugin-localrecs](#) - Generates personalized movie and TV recommendations based on local watch history without external services required.
- [jellyfin-plugin-media-cleaner](#) - Automatically removes played media after a specified time period.
- [jellyfin-plugin-MediathekViewDL](#) - Integrates MediathekViewDL into Jellyfin and allows users to search, download, and manage content.
- [jellyfin-plugin-meilisearch](#) - Enhances Jellyfin search speed and accuracy by offloading queries to a Meilisearch instance.
- [jellyfin-powertoys](#) - A collection of plugins to enhance Jellyfin with additional features and tools.

- [JellyfinTweaks](#) - Overrides Jellyfin settings such as *Enable Backdrops* and *Enable Theme Music* across all devices.
- [Jellyfin-Xtream-Library](#) - Syncs Xtream VOD and Series content to native Jellyfin libraries via STRM files, with automatic metadata lookup and Live TV support.
- [JellySTRMprobe](#) - Probes STRM files to extract media information (codec, resolution, duration, audio) that Jellyfin skips during library scans.
- [media-upload-plugin](#) - Media-manager that provides uploads, bulk downloads from URLs, and directory browsing within Jellyfin. 🕒Stale
- [quality-gate](#) - Restrict users to specific media versions based on configurable path-based policies, useful for bandwidth management or tiered access.
- [smart-covers](#) - Cover extraction for books, audiobooks, comics, magazines, and music libraries with online fallback via Open Library & Google Books.
- [whisper-sub](#) - Automatically generates subtitles using local AI models powered by Whisper, with all processing on your server.

?? Metadata Providers

- [jellyfin-imdb-rating-updater](#) - Downloads the IMDb ratings dataset daily and updates the CommunityRating field for library items with an IMDb ID without modifying other metadata.
- [jellyfin-plugin-AnimeMultiSource](#) - Aggregates anime metadata, tags, artwork, and people from multiple sources (AniList, AniDB, MAL/Jikan, TVDB, Fanart.tv) with rate limiting and persistent caching for large libraries.
- [jellyfin-plugin-applemusic](#) - Fetches album and artist metadata from Apple Music.
- [Jellyfin.Plugin.ArtworkMultiSource](#) - Combines posters and logos from TMDb and TVDB with language-aware priority and configurable sorting.
- [jellyfin-plugin-hikka](#) - Metadata and images for anime and manga from the Hikka website.
- [jellyfin-plugin-kinopoisk](#) - Metadata provider for [Kinopoisk](#).
- [Jellyfin.Plugin.MDBList_Ratings](#) - Retrieves ratings from MDBList using TMDb IDs and integrates them into Jellyfin's rating fields, with optional UI enhancements to display ratings from multiple sources.
- [jellyfin-plugin-myanimelist](#) - Provides MyAnimeList metadata for anime.
- [jellyfin-plugin-onepace](#) - Provides metadata and cover art for the [One Pace](#) project.
- [Jellyfin Plugin PhoenixAdult](#) - Metadata provider for adult content from multiple sites. 🕒Stale
- [jellyfin-plugin-shikimori](#) - Metadata provider for shikimori.one.
- [Jellyfin Plugin Stash](#) - Metadata provider for [Stash](#).
- [Jellyfin Plugin ThePornDB](#) - Metadata provider for ThePornDB.

- [jellyfin-youtube-metadata-plugin](#) - Provides metadata for YouTube content.

? Companion Apps & Tools

?? Artwork & Posters

- [aphrodite](#) - Enhances media library posters with quality indicators like resolution, audio codec, and review ratings. 🔄Stale
- [CoverMaker](#) - Allows designing and generating custom cover images for your media collections.
- [Jellyfin-Cover-Maker](#) - Website for creating consistent covers and posters for Jellyfin libraries.
- [Jellyfin-Image-Exporter](#) - Exports images (posters, banners, thumbnails) from Jellyfin metadata.
- [jellyfin-poster-hrd-logo](#) - Automatically downloads covers for HDR movies from TMDb and applies an HDR logo in the top-right corner. 🔄Stale
- [jellyfin_ratings](#) - Replaces Jellyfin ratings with ratings from various sources (IMDb, Trakt, Letterboxd, and others).
- [jellyfin-tools](#) - Generates images with Jellyfin-like styling such as shadow overlays and library title text. 🔄Stale
- [Jellyfin Update Poster](#) - Batch imports cover images from [ThePosterDB](#) and [MediUX](#), with set downloading support for MediUX.
- [jellytools](#) - CLI tool for synchronizing artwork and collections from Plex to Jellyfin and generating animated library card videos. 🔄Stale
- [pixelfin](#) - Inspects Jellyfin libraries for missing, present, or low-resolution images with export support.
- [Posterizarr](#) - Automates poster, background, and title card creation for Plex, Jellyfin, and Emby with customizable overlays.
- [TitleCardMaker](#) - Automated title card maker for Plex, Jellyfin, and Emby.

? Media Requests & Discovery

- [Anchorr](#) - Discord bot for Jellyfin media requests and new content notifications.
- [AudioBookRequest](#) - Request management tool for audiobooks on Plex, Jellyfin, and Audiobookshelf.
- [content-recommender](#) - Suggests movies or TV shows from your library based on watch history.

- [jellyfin-updoot](#) - Adds thumbs-up recommendations, per-item comments, and a "recommended by users" page.
- [jellyseerr](#) - Request management and media discovery tool for Jellyfin, Plex, and Emby.
- [List-Sync](#) - Automatically import movies and TV shows from IMDB or Trakt lists into [Jellyseerr](#). 🔧Beta
- [reiverr](#) - Combined interface for Jellyfin, TMDb, Radarr, and Sonarr. 🔧Beta
- [scenepeek-android](#) - An Android app that provides detailed movie and TV show information with TMDb and Jellyseerr integration.
- [SuggestArr](#) - Automatically request suggested movies and TV shows to [Jellyseerr](#) based on recently watched.
- [swiparr](#) - Swipe through your library, match with friends in a session, and find something everyone wants to watch.
- [whatseerr](#) - WhatsApp bot for Seerr that allows users to search and request media via WhatsApp messages.

? Statistics & Watch History

- [jellyfin-rewind](#) - A *Spotify Wrapped*-like experience for Jellyfin music listeners.
- [jellyfin-watch-updater](#) - Updates `lastPlayedDate` for watched items when clients fail to set it, enabling tools such as media cleanup plugins to correctly detect watched media.
- [JellyPlex-Watched](#) - Syncs watch history between Jellyfin, Plex, and Emby Servers.
- [Jellystat](#) - Statistics and analytics dashboard for Jellyfin.
- [jelly-watch-wise](#) - Monitors and enforces Jellyfin watch time limits per user, with API integration and a simple GUI. 🔧Stale
- [streamystats](#) - Statistics service for Jellyfin, providing analytics and data visualization.
- [watchstate](#) - Syncs play state between different media servers.

? User Management

- [Jellycord](#) - Discord companion bot for managing JFA-GO instances. 🔧Stale
- [jellyfin-telegram-channel-sync](#) - Syncs Jellyfin user access with Telegram channel membership, automatically disabling accounts when members leave.
- [jfa-go](#) - User- / Invite-Management system for Jellyfin.
- [jf-avatars](#) - Allows users to select avatars from an image gallery.
- [wizarr](#) - Advanced user invitation and management system.

? Media Organization

- [CineSync](#) - Python-based library management tool for organizing debrid and local libraries without Sonarr or Radarr.
- [Fixarr](#) - Cross-platform media renaming and backup tool. Beta
- [JellyCC](#) - Command-line tool that audits, repairs and optimizes media to ensure Direct Play on Jellyfin.
- [Jellyfin-Auto-Collections](#) - A tool to automatically make and update collections based on internet lists such as IMDb and Letterboxd.
- [JellyfinEasyMetadataManager](#) - Desktop tool for managing and editing metadata in Jellyfin libraries.
- [jellyfinmanager](#) - Command-line tool for managing Jellyfin watched status with backup/restore capabilities and missing episode detection using TVDB.
- [jellysweep](#) - Automatically removes old, unwatched movies and TV shows by analyzing viewing history and user requests.
- [mnamer](#) - Customizable tool to automatically rename and organize media files.
- [Multi-User Media Cleaner](#) - Query and delete unwanted media content from your Jellyfin server.
- [Squishy](#) - Transcode and download your Jellyfin media with fully customizable presets and hardware acceleration.

? Subtitles

- [bazarr-jellyfin](#) - Search and download subtitles directly from Jellyfin's native subtitle UI using your Bazarr instance.
- [OpenSubtitlesDownload](#) - Automatically or manually downloads subtitles using CLI/Gnome/KDE.
- [subgen](#) - Autogenerate subtitles using OpenAI Whisper Model via Jellyfin.

? Music

- [AudioMuse-AI](#) - Uses sonic analysis and AI-powered clustering to create tempo and mood-based playlists via the Jellyfin API.
- [jellyfin-theme-music-manager](#) - Web application for managing theme songs and backdrop videos for Jellyfin libraries.
- [jellyplist](#) - Utility for syncing Spotify playlists to Jellyfin. Beta
- [JellyTunes](#) - Sync your Jellyfin music library to any USB drive or SD card — with optional FLAC to MP3 conversion.

- [MusicBrainz-UserScripts](#) - One-click importing of album from Jellyfin into MusicBrainz.
- [Playlifin](#) - Converts YouTube Music playlists to Jellyfin playlists.

? Content Import

- [calibre2jellyfin](#) - Python script to construct a Jellyfin ebook library from a Calibre library.
- [trailarr](#) - Manages trailer downloads for your Radarr and Sonarr libraries.
- [trailerfin](#) - Automatically retrieves and creates STRM links to IMDb trailers and places them in the backdrops folder to view trailers on the details page.
- [ytdlp2STRM](#) - Streams YouTube, Twitch and more via yt-dlp to Jellyfin.
- [ytdl-sub](#) - Automates downloading and metadata generation with yt-dlp.

? Server Administration

- [ADRG](#) - Dynamic Docker resource governor using cgroups v2 to throttle background tasks during media activity.
- [autopulse](#) - Lightweight automation service that updates Plex, Jellyfin, and Emby libraries based on notifications from media organizers like Sonarr and Radarr.
- [autoscan](#) - Replaces the default Plex and Emby behaviour for picking up changes on the file system. Stale
- [Cloud Seeder](#) - One-click installer and maintainer for Jellyfin on Windows, macOS, and Linux.
- [declarative-jellyfin](#) - Declarative configuration of your Jellyfin server on NixOS. Beta
- [jellyfin-encoder](#) - Docker-based automatic 720p HEVC/AV1 transcoding service for Jellyfin libraries with NVIDIA and Intel hardware acceleration.
- [jellyhub](#) - Indexes media from multiple Jellyfin servers into a single searchable hub.
- [Jellyman](#) - CLI tool for installing, managing, and updating Jellyfin on Linux.
- [JellyRoller](#) - A CLI Jellyfin Controller. Beta
- [JellySearch](#) - A fast full-text search proxy for Jellyfin using Meilisearch.
- [Jellyswarm](#) - Reverse proxy that lets you combine multiple Jellyfin servers into one virtual instance.
- [Samsung-Jellyfin-Installer](#) - Cross-platform tool that helps you install Jellyfin on Samsung Smart TVs running Tizen OS.
- [Universal Plugin Repo](#) - Consolidates many plugin repositories to create a universal catalogue.
- [xsrv.jellyfin](#) - Ansible role to deploy and configure Jellyfin.

? Miscellaneous

- [embyToLocalPlayer](#) - Lets you watch videos from Jellyfin using a local video player (like VLC and MPV) and syncs watch progress back.
- [jelly-clipper](#) - Web application for creating, sharing, and managing video clips from Jellyfin libraries. 🔧Beta
- [Jellyfin Episodes Ratings Grid](#) - Show IMDb episode ratings in a heatmap-style grid on Jellyfin series pages.
- [jellyfin-mods](#) - Collection of modifications and customizations for personalizing Jellyfin.
- [Jellyfin Notification System](#) - Sends Telegram notifications with media images whenever a new movie, series, season, or episode is added to Jellyfin. 🔧Stale
- [Jellyfin Segment Editor](#) - Manage Jellyfin Media Segment positions.
- [KefinTweaks](#) - Collection of UI enhancements and customization tweaks for Jellyfin.
- [MPC-JF](#) - Launch external media players (MPC-HC, MPC-BE, PotPlayer) from Jellyfin Web or Jellyfin Media Player.
- [Scyphomote](#) - A dedicated remote control for Jellyfin with support for playback transparency, trickplay previews, and more.
- [tunarr](#) - Create custom live TV channels from your Plex or Jellyfin library with a web UI and IPTV support.

? Snippets

- [snippets/language-overlay](#) - A script to add flags to movie posters.

? Guides

- [jellyfin-on-macos](#) - Guide for hosting Jellyfin on macOS with dynamic DNS, geo-filtering, and monitoring dashboards.

? Related

This section includes software, guides and tools that are not *specifically* designed to work with Jellyfin, but can be useful for tasks related to media management or to enhance Jellyfin's functionality.

- [Dispatcharr](#) - Self-hosted M3U proxy with IPTV, EPG, and VOD management support.

- [ErsatzTV](#) - Stream custom live channels using your own media. 🔓Beta
- [Explo](#) - Automated music discovery tool that recommends tracks based on your listening history.
- [locatarr](#) - A list of tools used to automate the downloading and organization of media files.
 - [radarr](#) - Automates downloading & management of movies.
 - [sonarr](#) - Automates downloading & management of TV series.
 - [tdarr](#) - Distributed transcode automation + Library analytics + Video health checking. 🔓Paid
 - [recyclarr](#) - Automatically sync TRaSH guides to Sonarr and Radarr instances.
- [MediaTracker](#) - Media tracker and user rating platform with [Jellyfin integration](#).
- [Movary](#) - Media tracker and user rating platform. 🔓Beta
- [Multi Scrobblerr](#) - Scrobbles music from many sources to many clients. 🔓Beta
- [Quasarr](#) - Emulates a usenet indexer and download client to allow direct downloads with sonarr/radarr.
- [rffmpeg](#) - A remote FFmpeg wrapper, commonly used for transcoding media on more capable machines.
- [speedrr](#) - Change your torrent client's upload speed dynamically, on certain events such as when a Plex/Jellyfin stream starts.
- [Threadfin](#) - M3U proxy for Jellyfin (Based on xTeVe).
- [TRaSH Guides](#) - Easy-to-understand guides for Sonarr, Radarr, and Bazarr, along with related tools.

Communities

This section contains links to communities which focus on Jellyfin or related topics.

- [Jellyfin Discord](#) - The official Jellyfin Discord server. 🔓Official
- [Jellyfin Forum](#) - The official Jellyfin forum. 🔓Official
- [Jellyfin Matrix](#) - The official Jellyfin Matrix server. 🔓Official
- [r/Jellyfin](#) - The official Jellyfin subreddit. 🔓Official
- [r/JellyfinCommunity](#) - An independent, community-run subreddit.
- [JellyfinCommunity Discord](#) - An independent, community-run Discord server.
