

Caddy

1. Setup Caddy
 2. Make sure administration is set to port 8443
 3. also set firewall rules on wan to allow incoming connections on ports 80 and 443.
- Change the *TCP Port* to *8443* (example), do not forget to adjust the firewall rules to allow access to the WebGUI. On *LAN* there is a hidden *anti-lockout* rule that takes care of this automatically. On other interfaces, make sure to add explicit rules.
 - Enable the checkbox for *HTTP Redirect - Disable web GUI redirect rule*.
