

1. Installation

Installation Documentation: [Website](#)

According to their official documentation page we can install the Open Project as follows

1. Open up your Docker VM you want to install the open project on
2. Go inside your Arcane projects folder e.g /home/user/arcane/arcane-data/projects
3. Then clone the whole open project repository in there with the following command (Have Git installed)

```
git clone https://github.com/opf/openproject-docker-compose.git --depth=1 --branch=stable/17
openproject
```
