

9. Maintainer

Maintainer makes sure that your

Configure Jellyfin

1. Go to your Maintainer dashboard at ArrVM-IP:4007
2. Then the first thing we need to do is to connect to your Jellyfin server with the server URL and API key
3. To obtain the Jellyfin API key go to your Jellyfin instance -> Dashboard -> API-keys and make a new API key for maintainer
4. Then you can fill this information inside your Maintainer Jellyfin configuration

Configure Radarr

1. To connect Radarr you need to know the IP address with port number (4002) and again an API key
2. Go to Radarr instance > Settings > General > and copy the API key
3. Then fill it into the Maintainer Radarr configuration

Configure Sonarr

1. To connect Sonarr you need to know the IP address with port number (4001) and again an API key
2. Go to Sonarr instance > Settings > General > and copy the API key
3. Then fill it into the Maintainer Sonarr configuration

Configure Seerr

1. To connect Seerr you need to know the IP address with port number (4011) and again an API key

2. Go to Serr instance > Settings > General > and copy the API key

3. Then fill it into the Maintainerr Sonarr configuration
