7. Music

- 1. ArchiveTune Music
  - 1. Installation
- 2. Lidarr
- 3. Naviodrome

1. ArchiveTune Music

ArchiveTune Music is an open source youtube

1. Installation

Source: Github

2. Lidarr

Lidarr is part of that Arr stack, which is basically the music equivalent of radarr and sonarr for movies and tv shows respectively. You can upload or download music to your collection and then listen to it via different music clients. In this chapter we explain how to configure it and which clients you can possibly use.

3. Naviodrome

Naviodrome is a music player that collects all artworks from artists and their music s.t you can play it and self host it completely.
